Contents of Volume 129

Number 1, May 1991

Catalytic Hydrogenation of 1,3-Butadiene on Pd Particles Evaporated on Carbonaceous Supports: Particle Size Effect B. Tardy, C. Noupa, C. Leclercq, J. C. Bertolini, A. Hoareau, M. Treilleux, J. P. Faure, and G. Nihoul	1
Catalysts for Vapor-Phase Dehydration of Ethylene Glycol and Their Application to Pyruvic Acid Synthesis S. Sugiyama, S. Fukunaga, K. Ito, S. Ohigashi, and H. Hayashi	12
The Influence of Framework-Gallium in Zeolites: Electronegativity and Infrared Spectroscopic Study D. H. Dompas, W. J. Mortier, O. C. H. Kenter, M. J. G. Janssen, and J. P. Verduijn	19
Catalyzed Deuterium Exchange and Decomposition Reactions of Methylhydrazine and 1,1-Dimethylhydrazine on Transition Metals S. R. Logan	25
Enthalpy Changes during O₂ Adsorption and H₂ Titration of Adsorbed Oxygen on Platinum B. Sen and M. A. Vannice	31
Acidic Properties of Oxides Containing Niobia on Silica and Niobia in Silica P. A. Burke and E. I. Ko	38
Alumina-Supported Bimetallics of Palladium Alloyed with Germanium, Tin, Lead, or Antimony from Organometallic Precursors. II. Gas-Phase Hydrogenation of 2-Methyl-1-Buten-3-yne (Valylene) and 2-Methyl-1,3-Butadiene (Isoprene) Hugo R. Aduriz, Pedro Bodnariuk, Bernard Coq, and François Figueras	47
Conversion of Cyclohexane on Ni-(Sb,Pb,Cu)/Al₂O₃ Bimetallic Catalysts H. D. Lanh, Ng. Khoai, H. S. Thoang, and J. Völter	58
Solid Electrolyte Cyclic Voltammetry for <i>in Situ</i> Investigation of Catalyst Surfaces C. G. Vayenas, A. Ioannides, and S. Bebelis	67
2-Propanamine Adsorption on a Fluid Catalytic Cracking Catalyst A. I. Biaglow, C. Gittleman, R. J. Gorte, and R. J. Madon	88
Supported Aqueous-Phase, Rhodium Hydroformylation Catalysts. I. New Methods of Preparation Juan P. Arhancet, Mark E. Davis, and Brian E. Hanson	94
Supported Aqueous-Phase, Rhodium Hydroformylation Catalysts. II. Hydroformylation of Linear, Terminal, and Internal Olefins Juan P. Arhancet, Mark E. Davis, and Brian E. Hanson	100
Surface Interaction between Methane and Alkali/Alkaline-Earth Oxide Catalysts Teresa Grzybek and Manfred Baerns	106
Comparison of the Performance Characteristics of Pt/SnO_x and Au/MnO_x Catalysts for Low-Temperature CO Oxidation Steven D. Gardner, Gar B. Hoflund, Billy T. Upchurch, David R. Schryer, Erik J. Kielin, and Jacquelin Schryer	114

Methylcyclopentane Conversion Catalysis by Zeolite Encaged Palladium Clusters and Palladium-Proton Adducts	
Xinlai Bai and Wolfgang M. H. Sachtler	121
A Fourier Transform Infrared Spectroscopic Study of CO₂ Methanation on Supported Ruthenium	
Michael R. Prairie, Albert Renken, James G. Highfield, K. Ravindranathan Thampi, and Michael Grätzel	130
Platinum/Zeolite Catalyst for Reforming <i>n</i>-Hexane: Kinetic and Mechanistic Considerations	
Gerald S. Lane, Frank S. Modica, and Jeffrey T. Miller	145
Synthesis of Propylene Oxide from Propylene and Hydrogen Peroxide Catalyzed by Titanium Silicalite	
M. G. Clerici, G. Bellussi, and U. Romano	159
Interaction of Arsenious Oxide with DeNO_x-Catalysts: An X-Ray Adsorption and Diffuse Reflectance Infrared Spectroscopy Study	
Frank Hilbrig, Herbert E. Göbel, Helmut Knözinger, Helmut Schmelz, and Bruno Lengeler	168
Evidence for the Presence of a Bimolecular Pathway in the Isomerization of Xylene on Some Large-Pore Zeolites	
A. Corma and E. Sastre	177
The Catalytic Reduction of Nitric Oxide by Ammonia over a Clean and Vanadium Oxide-Coated Platinum Foil	
M. F. H. van Tol, M. A. Quinlan, F. Luck, G. A. Somorjai, and B. E. Nieuwenhuys	186
Surface Area Determination of Supported Oxides: WO₃/Al₂O₃	
R. L. Brady, D. Southmayd, C. Contescu, R. Zhang, and J. A. Schwarz	195
Catalytic Decomposition of Nitric Oxide over Cu-Zeolites	
Yuejin Li and W. Keith Hall	202
Electrocatalytic Conversion of Carbon Dioxide to Methane and Oxygen with an Oxygen Ion-Conducting Electrolyte	
Turgut M. Gür, Henry Wise, and Robert A. Huggins	216
A Novel Clay-Based Catalytic Material—Preparation and Properties	
Roger J. Lussier	225
Transport-Enhanced α-Olefin Readsorption Pathways in Ru-Catalyzed Hydrocarbon Synthesis	
Enrique Iglesia, Sebastian C. Reyes, and Rostam J. Madon	238
Electron Microdiffraction Study of Pt-Sn-Alumina Reforming Catalysts	
Ram Srinivasan, Larry A. Rice, and Burtron H. Davis	257
Oxide Acid-Base Reactions Relating to the Inhibition of Vanadium Attack on REY Zeolite Catalysts	
R. L. Jones	269
Role of ZSM-5 and Ultrastable Y Zeolites for Increasing Gasoline Octane Number	
Rostam J. Madon	275

Notes

A Kinetic Approach to the Problem of Reaction Yield Optimization: Isomerization of 1,5-Cyclooctadiene Catalyzed by Ir₄(CO)₁₂/SiO₂	
A. Trovarelli, G. Dolcetti, J. Kaspar, and M. Graziani	288

Acidity and Sorbate Shape Selectivity of H-ZSM-22, H-ZSM-48, and H-ZSM-50 Zeolites	
Vasant R. Choudhary, Anand P. Singh, and Rajiv Kumar	293
Structural Changes in a Cu/Al₂O₃ Catalyst when Used for Oxidation of Carbon Monoxide	
J. Laine, F. Severino, A. López-Agudo, and J. L. G. Fierro.....	297
Protium–Deuterium Exchange Mechanism between Hydrogen in Gas Phase and Hydrogen Sorbed by Mg₂Ni Modified by Chloranil	
S. Tsuchiya, H. Morishige, and H. Imamura.....	300
Characterization of Acid–Base Properties of Oxides via the Selective Ring-Opening of 2-Methyloxirane	
Árpád Molnár, Imre Bucsí, Mihály Bartók, Gábor Resofszki, and Gyula Gáti	303
Surface Oxide-Support Interaction (SOSI) for Surface Redox Sites	
Goutam Deo and Israel E. Wachs	307

Book Review

New Developments in Selective Oxidation. Edited by G. Centi and F. Trifirò.	
Studies in Surface Science and Catalysis by B. Delmon and J. T. Yates, Jr.	
Graham J. Hutchings.....	313

Number 2, June 1991

Design of a Stable, Selective Catalyst for CO Hydrogenation: Osmium in Basic Y Zeolite	
P.-L. Zhou, S. D. Maloney, and B. C. Gates.....	315
Effects of Surface and Structural Properties of Carbons on the Behavior of Carbon-Supported Molybdenum Catalysts	
J. M. Solar, F. J. Derbyshire, V. H. J. de Beer, and L. R. Radovic	330
Reactant-Promoted Reaction Mechanism for Water–Gas Shift Reaction on ZnO, as the Genesis of Surface Catalysis	
Takafumi Shido and Yasuhiro Iwasawa.....	343
Hydrogenation of Olefins on Platinum	
C.-M. Pradier and Y. Berthier.....	356
Homologation of Propene with Methane Using Nickel-Supported Catalysts: A Surface Characterization Study	
Cesar Ovalles, Vladimir Leon, Sheila Reyes, and Francisco Rosa	368
The Trigger Mechanism for Polymerization of α-Olefins with Ziegler–Natta Catalysts: A New Model Based on Interaction of Two Monomers at the Transition State and Monomer Activation of the Catalytic Centers	
Martin Ystenes	383
Characterization of RuCu/SiO₂ Catalysts by Infrared Spectroscopy of Adsorbed Carbon Monoxide	
Renbiao Liu, Bernd Tesche, and Helmut Knözinger	402
The Poisoning Action of Iron on Electrolytic Silver Catalysts Used for Partial Oxidation of Methanol	
Deng Jingfa, Bao Xinhe, and Dong Shuzhong	414

A Study of Catalytic Activity, Constituent, and Structure of V-Ag Catalyst for Selective Oxidation of Toluene to Benzaldehyde	
Zhang Hui-liang, Zhong Wei, Duan Xiang, and Fu Xian-cai	426
Formation of Ketenes by Reaction of Carboxylic Acids over Alkali Metal-Exchanged Zeolites	
L. M. Parker, D. M. Bibby, and I. J. Miller	438
Coated Silica as Support for Platinum Catalyst. I. Coating of Silica with Alumina, Titania, and Lanthana	
Yi-Shen Tan, Lin-Qi Dou, Da-Shun Lu, and Dong Wu	447
Effective Diffusivities in Catalyst Pellets: New Model Porous Structures and Transport Simulation Techniques	
Sebastian C. Reyes and Enrique Iglesia	457
Microstructures of Pt-Sn and Rh-Sn Particles on SiO₂	
T. P. Chojnacki and L. D. Schmidt	473
Investigation of the SMSI Phenomenon with TiO₂/Ru/SiO₂ Model-Dispersed Catalysts	
Jas Pal S. Badyal, Richard M. Lambert, Kevin Harrison, Christopher C. A. Riley, and Jonathan C. Frost	486
Oxidation of Ethane over Silica-Supported Alkali Metal Vanadate Catalysts	
A. Erdöhelyi and F. Solymosi	497
Effect of Mo Loading of MoS₂/γ-Al₂O₃ on Diene Hydrogenation: Evidence of an "Elementary Ensemble" Site	
L. Jalowiecki-Duhamel, J. Grimblot, and J. P. Bonnelle	511
The Mechanism of Hydrogenolysis and Isomerization of Oxacycloalkanes on Metals. IX. Structure Sensitive Hydrogenolysis and Isomerization of Methyloxirane over Well-Characterized Pt/SiO₂ Catalysts	
D. Ostgard, F. Notheisz, Á. G. Zsigmond, G. V. Smith, and M. Bartók	519
Collective Behavior of Many Langmuir-Hinshelwood Reactions	
Teh C. Ho	524
Surface Chemistry on Transition Metal Colloids—An Infrared and NMR Study of Carbon Monoxide Adsorption on Colloidal Platinum	
John S. Bradley, John M. Millar, Ernestine W. Hill, and Sutinder Behal	530
Notes	
The Effect of Pre-adsorbed Sulphur on Carbon Monoxide Hydrogenation over Rhodium/Silica	
S. David Jackson, Brian J. Brandreth, and David Winstanley	540
Effects of the Support and Sintering on Hydrogen Uptake of Nickel Supported on Porous Vycor Glass	
Issei Fujiyoshi	544
Author Index for Volume 129	546

NOTICE

The Subject Index for Volume 129 will appear in the December 1991 issue as part of a cumulative index for the year 1991.

INFORMATION FOR AUTHORS

The *Journal of Catalysis* publishes articles dealing with original studies in heterogeneous and homogeneous catalysis as well as studies relating catalytic properties with chemical processes at surfaces, studies of chemistry of surfaces, and engineering studies related to catalysis. All articles will be published in English.

Submission of Manuscripts. Manuscripts should be sent by registered mail to either of the Editors:

Professor Gary L. Haller
Department of Chemical Engineering
P.O. Box 2159 Yale Station
Yale University
New Haven, Connecticut 06520

Professor Frank S. Stone
School of Chemistry
University of Bath
Bath BA2 7AY, England

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Catalysis* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of Manuscript. Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. Submit manuscript (in English) in triplicate, including the original typewritten copy, with copies of all figures and tables. Originals of micrographs should also be submitted in triplicate for purposes of manuscript reviewing. All material (including tables, reference lists, etc.) should be typed double-spaced on one side of 8.5 × 11-in. white bond paper (with 1-in. margins on all sides). Each page of the manuscript should be numbered. *Page 1* should contain the article title, authors' names (without degrees), affiliations, a running title (abbreviated form of title) not exceeding 45 letters and spaces, and the name and complete mailing address (and telephone and fax numbers, if possible) of the person to whom proof should be mailed. *Page 2* should contain a short abstract.

Authors should use descriptive headings in this order: Abstract, Introduction, Methods, Results, Discussion, Acknowledgments, and References.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

If the manuscript refers to recently submitted manuscripts or papers in press (with the *Journal of Catalysis* or other journals) then please supply three copies of them so that the reviewers can judge the new manuscript in its proper context.

Revised manuscripts should be returned with one copy marked to show where changes have been made.

Notes and Letters to the Editor may not exceed 8 double-spaced typewritten manuscript pages (including tables and figures). Accepted Notes will not receive publication priority over articles.

Letters to the Editor will be considered for priority publication under the following conditions: (a) Letters must be related to some statement made in a recently published article in this Journal; (b) in cases of conflicting views on any topic, no more than one Letter from each author will be accepted.

Units of weights, measures, etc., when used in conjunction with numerals should be abbreviated and unpunctuated (e.g., 10%, 50 ml, 3 g, 8 cm).

The SI (Système International) system of units will be accepted without editorial change. Authors using other units are encouraged to define them in terms of SI units once in each publication, e.g., in an article where pressures are quoted in Torr to write "1 Torr = 133.3 N m⁻²." For information concerning SI units, see *Quantities, Units and Symbols for Physical Chemistry*, 4th ed., prepared by I. Mills and published by Blackwell Scientific, Oxford, 1988.

Footnotes should be avoided if possible; but if essential, they should be designated by superscript Arabic numerals (starting with title) in the text.

Tables should be numbered with Arabic numerals in order of mention in the text. They should be typed double-spaced on separate pages. Each table should have a short descriptive caption typed (double-spaced) above the table. Table footnotes (indicated by superscript, lowercase, italic letters) should be typed at the end of the table.

Figures should be numbered with Arabic numerals in order of mention in the text; each figure should have a descriptive legend. Legends should be typed double-spaced together on a separate page. All illustrations should be in finished form suitable for reproduction. They should be planned to fit the proportion of the printed page (5.5 × 8 in.; column width, 2-5/8 in.). No figures should exceed 8.5 × 11 in. (21 × 27.5 cm). Lettering on drawings should be of professional quality or generated by high-resolution computer graphics and should be large enough (10–12 points) to take a reduction of 50–60%. Drawings should be made with black India ink on tracing linen, smooth-surface white paper, or Bristol board. Alternatively, high-quality computer graphics may be acceptable. Graph paper if used should be ruled in blue. Grid lines that are to show in the final reproduction should be inked in black.

Copies of drawings are not acceptable unless they are high contrast glossy prints. All but the very simplest structures and structural formulas must be designed for direct reproduction. Illustrations in color can be accepted only if the authors defray the cost.

Electron micrographs. Please supply three photographic copies of these so that the reviewers can inspect the fine details they contain.

References to the literature should be cited in the text by italic Arabic numerals in parentheses, set on the text line, and listed numerically at the end of the paper. Abbreviations of journal titles should follow the style used in *Chemical Abstracts' Service Source Index*, 1985. Style and punctuation of references should be in accordance with the following examples:

1. Latef, A., Aissi, C. F., and Guelton, M., *J. Catal.* **119**, 368 (1989).
2. Louis, C., and Che, M., in "Reactivity of Solids" (P. Barret and L. C. Dufour, Eds.), Vol. B, p. 1057. Elsevier, Amsterdam, 1985.
3. Pines, H., "The Chemistry of Catalytic Hydrocarbon Conversions." Academic Press, New York, 1981.

Proofs. Proofs will be sent to the author, with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

Reprints. Fifty reprints without covers will be provided free of charge. Additional reprints may be purchased; an order form will be included with proofs.

Personal Computer Disks. Manuscripts may be submitted to the *Journal of Catalysis* on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Please supply the file as a straight ASCII file with generic codes specified by the publisher. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular and mathematical material will be typeset conventionally. Art must be prepared as camera-ready copy; see the section on Figures earlier in this Information for Authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing the disk for typesetting conversion and a list of generic codes, please contact the publisher (Associate Director, Journal Division, Academic Press, 1250 Sixth Avenue, San Diego, California 92101; telephone: (619) 699-6415; fax: (619) 699-6800).
